EDUCATION

Habib University

B.S. Computer Science

September 2020 - June 2024

University of Cambridge

GCSE Engineering

August 2018 - August 2020

SKILLS

Languages: Python, JavaScript/TypeScript, C/C++, SQL, HTML/CSS

Frameworks: React, Next.js, TailwindCSS, Redux, React Router, Node.js, Express, FastAPI, Redis

Databases: MySQL, PostgreSQL, NoSQL

Cloud/DevOps: AWS (EC2, S3, RDS), Docker, Git/GitHub, Unix/Linux

EXPERIENCE

QLU.AI | *Full-Stack Engineer (TypeScript/React/Node.js/Next.js)*

June 2024 – Oct 2024

- Built full-stack web applications with React, Next.js, TailwindCSS, and Node.js/Express.
- Optimized REST APIs using Redis caching and database indexing, reducing query times by 50%.
- Improved user flows with Redux and React Router, boosting engagement by 20%.

Jacqueline Construction | *Software Developer (TypeScript/React/Node.js/Express)*

Oct 2024 – Current

- Developed a job tracking system and MySQL-backed time tracker, cutting reporting time by 70%.
- Integrated Redux, React Router, and NTTA APIs with Redis caching, improving usability and responsiveness.
- Deployed services on AWS EC2/S3 with monitoring and scalability best practices.

PERSONAL PROJECTS

Yohsin Connect | *Python, LangChain, FAISS, PyTorch, TensorFlow*

Ongoing

- Developed a Retrieval Augmented Generation (RAG) chatbot to provide instant responses to inquiries from prospective students at Habib University.
- Integrated advanced LLM models using TensorFlow and PyTorch to understand and generate human-like responses.
- Utilized LangChain for streamlined implementation of chat functionalities and FAISS for efficient information retrieval from a large vector database/store of university related documents.
- Ensured seamless operation and scalability of the chatbot by deploying it with Streamlit

BomberMan Clone | *C++, SDL2, Sprite Animations, Polymorphism*

December 2021

- Recreated the classic Bomberman game using C++ and SDL2, incorporating sprite animations and custom game mechanics.
- Implemented object-oriented design patterns and polymorphism to enhance code modularity and maintainability.
- Developed core gameplay features including player movement, bomb placement, and explosion mechanics.
